ANNOUNCEMENT.

For Circuit Court Clerk.

We are authorized to announce James L. Conner as a candidate for Circuit Clerk of Bath county, subject to the action of the Democratic party. Election, November, 1903.

We are authorized to announce Jason J. Mark as a candidate for Circuit Court Clerk of Bath county, subject to the action of the Democratic party.

SENATOR MORGAN refuses to be even a father-in-law of the Panama Canal.

The bill for admitting the four southwestern territories to Statehood seems assured of passage since it has been tacked on to the Postoffice appropriation bill.

ANDREW CARNEGIE offered to be Venezuela's angel \$300,000's worth when Germany held out for that sum in cash. Carnegie is the real thing in the philanthropic line now.

In reply to the question whether he would accept the Democratic nomination Grover Cleveland replied like the Delphic oracle, and still did it so neatly that he leaves his enemies no excuse to scold.

By making the new Department of Commerce the President's Cabinet will have one more member and Uncle Sam many hundreds more of people on his pay-rolls. "Of the making of books" and of offices there is no end.

BRYAN says more than he is not and will not be a candidate for the Democratic Presidential nomination in 1904. But he doesn't say he won't but if the nominee is one who didn't support the platform of 1896 and 1900.

The French scientists who have succeeded in producing colored natural silk by feeding the worms on leaves smeared with the color desired have given President Roosevelt a pointer in regard to eliminating the vexatious color line.

The latest turn in the royal scandal of Saxony is the divorce of Crown Prince Frederick and the Crown Princess. The stage and lecture platform of the United States are now open to correspondents Giron and his royal paramour.

BRYAN was afraid to eat a banquet with Cleveland. Although Cleveland is the bigger man, Bryan has the bigger mouth, besides he might have practiced the fork-gone-down-empty, knife-come-up-full and got more grub than his hated brother Democrat.

The banquet of the Jefferson-Jackson-Lincoln League at Columbus, O., on Lincoln's birthday was made the occasion for launching a boom of Wm. B. Hearst, of New York Journal fame, for President. This boom is nearly certain to get frost-bitten.

SENATOR HANNA's bill to pension former slaves is a sorry piece of politics. It stands no earthly show for enactment, raises false expectations in its proposed beneficiaries, and gives adventurers opportunities to swindle the ignorant and credulous of the ex-slaves.

The Kansas legislature, by a vote of 62 to 51, refused women a vote for Presidential electors, doubtless thinking that there were enough voters already, especially as a large percentage of good men don't take enough interest in elections to vote generally.

The Venezuela trouble has at last been referred to the Hague International Court of Arbitration, but pay day will come for Venezuela inevitably. Minister Bowen has earned international fame as a diplomat and is about the only one that comes out of the embroglio with any glo.

The anti-trust legislation of Congress is a case of much cry and little wool. The Elkins bill prohibiting freight rebates and discriminations and making it a penalty for both common carriers and shippers to violate the bill's provisions is in course of enactment. It will amount to nothing practically.

Wm. J. BRYAN made a speech at the banquet of the Jefferson-Jackson-Lincoln League at Columbus, O., last Thursday night. He boasted the alleged deserters from the Democratic party, but it is not likely that he strengthened his party any by it. The members of the League may be Democrats, but Lincoln as a Democrat seems the height of absurdity.

The Senate committee by a vote of 6 to 8 reported adversely the nomination of the negro Dr. W. D. Crum to be Collector of the Port of Charleston, S. C. The matter will be fought out in the Senate, with the probability of the majority sustaining President Roosevelt by confirming Crum's nomination. A rejection would be very embarrassing to the President, who would likely feel under obligations to appoint another negro in order to make a color test of the Senate's sentiments.

HARRISON for Circuit Judge and Slattery for Commonwealth's Attorney had an easy victory for the Democratic nominations in our neighboring Nineteenth Judicial district precinct meetings Saturday. The convention meets at Vanceburg the 25th inst.

KENTUCKY is becoming something of a coal-producing State herself. In 1902 there were mined 6,421,266 short tons, an increase of over a million tons over 1901. However, whether warranted or not, in this section there is a decided preference for Virginia coal at a higher price over the Kentucky product.

OWING to there having entered the Confederate Home at Pewee Valley a larger number of veterans than expected there is an urgent need for more funds to maintain the institution. Therefore the friends of the Home are expected to rally to its support with as liberal contributions as they can afford.

U. S. CIRCUIT JUDGE Grosscup, of Chicago, in an address at Michigan University Saturday said in effect that the trust situation must be reformed or socialism would result. It is strange that the trust magnates don't see that such is the inevitable outcome. The Rockefeller fortune in its natural growth into the billions is a menace that can't be disregarded.

The House Philippine Tariff bill granted a reduction from 75 per cent. to 25 per cent. of Dingley law rates on importations from the Philippines. The Senate committee amended it by granting free trade in all products except sugar and tobacco, which are taxed 50 per cent. Such a thing as a fair show to the Philippine is not to be considered if any powerful United States interest demands otherwise.

GEN. BASIL W. DUKE doubtless greatly astonished President Roosevelt as one Kentuckian who declined a great office. The President tendered him the nomination for U. S. Circuit Judge to succeed Judge Day and urged him to accept, but Gen. Duke, being committed to other applicants, felt that he couldn't with entire honor to himself accept. Gen. Duke's delicate sense of the proprieties does distinguished honor to Kentucky.

In spite of her extreme age it was thought by her physician and friends that she would soon be well again, but on Sunday morning, after telling her family what she wanted for breakfast, she asked her husband to help her up. She suffered an attack of heart trouble and lived but a little while, dying about 8 o'clock. She had all the attention her husband and neighbors could give her. I am not in favor of leasing church ground, school ground and graveyards to the company.

There was a time perhaps when it was all right and proper for railroads to have been owned by private corporations. That was before they were in such universal use. The commerce of the world is now dependent upon them. Everything the farmer, miner or manufacturer produces must now be carried to market by them. They are so intimately connected with the public that the public should close the trade with them. Well, close the trade with them, or some street or a public highway. But not run free. Charges sufficient to keep up expenses should be collected.

The dirt roads are about closed for travel. The turnpikes are getting in a bad condition. In fact there are some portions that are worn to bed rock, some places through. In repairing I notice that there is only a pretense; a shovelful of rock here and there does not hold the travel up out of the mud.
